ulrich medical® Tourniquets

Secure application with 2 clicks

The new touch screen tourniquets

Three models of the new generation of ulrich medical® tourniquets are available: With elsa™, heidi™ and sophie™, we offer the ideal device to meet every requirement.

Intelligent

Well-thought-out functions, for example, the automatic start of the timer and protocol printer guarantee ease of use and maximum user-friendliness.

Simple

The tourniquet is operated using simple, easy-to-understand symbols on a language-neutral touch screen.

Safe

The unique ulrich medical® safety design contains comprehensive safety functions:

- Self-test at device start-up
- Automatic leak handling
- Maintenance of cuff pressure in the event of loss of power.
- Individual pressure presetting with automatic pressure adjustment in the event of over- and underpressure.

P/SG TM mein Tourniquet

Reliable

An acoustic and visual display provides a warning in the event of a low battery status.

Adjustable

In addition to use with mains power, the device can also be operated up to 4 hours using the back-up battery. The automatic switching is performed without pressure fluctuations.

Bilateral

With heidi™ and sophie™, simultaneous surgery on both arms or legs or on one arm and one leg can be performed.

IVRA applications

Two color-coded connections as well as color-coordinated matching on the touch screen; the hoses and cuffs allow simple and uncomplicated IVRA applications.

Mobile stand

for ulrich medical® tourniquets

Mobile stand for elsa™, heidi™, sophie™: UT 1382

Includes: Convenient basket for storing cuffs and accessories

(hoses, cable)

Dimensions: Height with device: 1115 mm

Diameter of device base: 420 mm 420 x 420 x 1115 mm

(W x D x H; height incl. device)

Weight: 10.4 kg

Adjustable mounting block

for standard rail

Mounting block for elsa™, heidi™, sophie™: UT 1383

For mounting $elsa^{TM}$, $heidi^{TM}$, $sophie^{TM}$ on horizontal standard rails in the OR

Allows position adjustment in 7 different levels

Protocol printer

elsa[™], heidi[™] and sophie[™]

elsa™ incl. protocol printer: 1380-EP heidi™ incl. protocol printer: 1380-HP sophie™ incl. protocol printer: 1380-SP

Functions:

- Automatic recording of all relevant data from a blood arrest application
- Plug & play documentation
- Simple procedure for opening the protocol

Accessories:

Printer paper UT 1381-01 (paper width 58 mm)

The protocol printer can also be retrofitted at a later point in time (UT 1381).

All-round protection in a small format

balbina[™] – The compact one

With its compact, space-saving format, the balbinaTM tourniquet is the ideal companion for physicians who work in a mobile environment. balbinaTM persuades with its flexibility: It can be operated intuitively and purely pneumatically without power. Simply attach the device to an external compressed air supply and it is ready for operation, quickly and effortlessly.

Item number	UT 1132
Mounting on mobile stand	UT 1133
Adjustable mounting block (UT 1216-00) for mounting on standard rail (7-stage adjustment)	Optional
Cuff pressure can be continuously set in a range between 30 and 650 mmHg	\checkmark
Timer for time control	\checkmark
Electricity-independent in the case of a central gas supply system	\checkmark
Optical compressed air indicator on the user interface shows device status	\checkmark

Technical data

ulrich medical® disposable cuffs

The fast road to safety

Reliable hygiene. Streamlined process.

The new ulrich medical® disposable cuffs fit 100% into your hygiene concept.

As a disposable product, they ensure the highest level of hygiene safety and reliability, regardless of hospital and surgical processes. The disposable cuffs will maximize flexibility for your staff members, making their jobs much easier.

Available in sizes 2XS to 2XL (parallel shape) and XL (tapered shape) and also as an IVRA version for your regional anesthesia, ulrich medical® disposable cuffs are a reliable partner at your side.

For single use – no additional time and expenses for reprocessing in your CSSD.

Size XL with additional symbol to help with positioning of the tapered

Easy to apply thanks to a Velcro® closure and additional safety band

Active prevention of a chain of MRSA microbe transmission in the hospital

Reduces your investment budget and optimizes your process costs

Can be applied quickly for emergency patients

Sterile packaging* – no risk of cross-contamination

Green connector: for assuan™, kariba™, nurek™

Orange connector: for elsa™, heidi™, sophie™, balbina™ **Standard connector:** Connection of the cuffs to third-party devices

 Sterile products are generally not returnable

ulrich medical® multi-use cuffs

Convenient high-performance quality

Maximum application quality. Extremely gentle for patients.

ulrich medical® multi-use cuffs consist of comfortable high-tech synthetic fibers. This is what makes the cuffs unique. They can be sterilized with steam and can therefore be reused without hesitation. The cuffs can be placed with optimal fit thanks to the elasticity of the material.

Since the individual components of the cuffs can be disassembled, a long life cycle and high degree of efficiency is guaranteed. Available in sizes 2XS to 3XL, ulrich medical® multi-use cuffs are your optimal partner for maximum application quality and a high degree of patient comfort, particularly during long surgical procedures.
